

Seattle City Light 2013-2018 Strategic Plan Worker Safety Presentation

Seattle City Council
June 26, 2012

Current Safety Improvements

- **Centralized safety unit**
 - Consistent implementation of safety policies and procedures
 - TRR decreased from 11.1 in 2005 to 6.7 in 2008
- **Proactive Safety Measures**
 - Field Safety assessments and audits
 - Site Specific facility inspections
- **Management and Supervisor Training**
 - Root cause analysis
 - Post Injury follow up
 - Post injury investigations

Safety Tracking and Trends

- **Current System is manual**
- **SCL currently tracks:**
 - Nature of the injury
 - Body location of the injury
 - Job classification of injured worker
 - Root cause of the injury
 - Organizational unit where the injury occurred

Safety Culture Promotion/ Practice Initiative

- Proposed System –
 - Fully Automated reporting, tracking and notification
 - Trend Analysis down to the crew or individual level
 - Investigation documentation
 - Tracking follow up assignments and completion
 - Safety scorecard that measures positive behaviors
